AUGUST 29, 2017

Date

Items for Bid: BACK UP AND RECOVERY SOLUTION

Bid No. 18DC01

Bid Amount: \$107,254.06

BIDDER

1. Aprisa Technology LLC
2. Netwize
3. Quest Software

PURPOSE: The proposed solution will replace our aging tape based backup system with a modern disk based backup system. The current system is running on outdated hardware and is unable to keep up with the amount of data we have to backup. In addition to increasing our capability to backup and restore data in a timely manner the new solution will allow us to maintain a secondary offsite copy of the backups. Currently the backup tapes are rotated out of the datacenter on a weekly basis. This means that if physical damage were to occur in the datacenter, such as a fire, not only would we lose the primary data source but we would also lose the most current backups. With the new solution a secondary copy of the backup will be immediately created offsite in our secondary datacenter located at JATC South.

BUDGET: Computer Upgrade and Replacement

BID SELECTED: Quest Software

Recommendations to the Board of Education: Information Systems recommends awarding a contract to Quest Software, as they are the lowest responsive and responsible bidder that complies with the specifications, terms and conditions of the bid.
