**FINDING BY CHIEF PROCUREMENT OFFICER
JORDAN SCHOOL DISTRICT**

There was a sewer backup at Welby Elementary school on 2/23/2023 which was affecting the school in such a way that raw sewage was entering the school. Remedial efforts were attempted, but nothing resolved the problem. A more extensive solution was required and the on-site vendor, Beehive Plumbing, was given authorization to proceed. This was a matter of public safety, inasmuch as further delay would jeopardize the health of students and staff. It was my judgement as the chief procurement officer, and one delegated by the Board of Education – Jordan School District, that an emergency purchase was authorized to mitigate the sewer line breakage and repair the line.

Kurt A. Prusse
Chief Procurement Officer
